

**NETWORKING**

Ethernet is the most widely used local area network (LAN) access method, defined by the IEEE as the 802.3 standard. A 10/100 port means that it supports both 10BaseT at 10 megabits per second (Mbps) and 100BaseT at 100 Mbps. The most common interfaces are:  
 10Base2 (BNC Connector - RG6 52ohm Coax Cable - 185m)  
 10BaseT (RJ45 Connector - Cat3 Cable [or better] - 100m)  
 100BaseT (RJ45 Connector - Cat5 Cable [or better] - 100m)  
 1000BaseT (RJ45 Connector - Cat5e Cable [or better] - 100m)
